

CloudWORQ Planning is a cloud-based financial planning and analytics solution specifically designed for NetSuite.

With CloudWORQ Planning, you can replace your existing problematic planning process in weeks with a streamlined, collaborative, cloud-based model.

Pre-built reports are based upon QueBIT's award winning best practices and customizable to your business. Our solution includes:

- Budget & Forecasting
- Departmental Expense Planning
- Workforce Planning
- Product Profitability Analysis
- Currency Translation
- Workflow and Approval Process Management
- Financial Analysis and Reporting

Additional benefits include:

- Supports NetSuite and NetSuite One World financial reporting
- Budget versioning, NetSuite standard CDL and subsidiary segments
- Add custom segments/dimensions
- Reusable Excel standard reports with automated data refreshes that preserve formatting and calculations
- Predictive Modeling capabilities using advanced algorithms and techniques
- Minimal training required, intuitive user experience
- Rapid and economical implementation
- QueBIT manages and maintains the solution
