

## New Training Offers – Anaplan Training

QueBIT's expert certified Anaplan instructors know which Model Building topic areas are most important and useful to focus on, so students come away with quality knowledge that they can use immediately, while also building a strong foundation for continuing their Anaplan learning journey.

### Anaplan Quick Start Training

Learn Anaplan terminology and basic model schema concepts in just 1 day with this condensed Quick Start course.

#### Summary:

Prepare for a design meeting with your consulting team by learning the basics of how to build lists, hierarchies, modules, line items, formulas and dashboards.

#### Course Objectives:

Distill the course objectives from Anaplan's Level 1 Model Building Certification course.

- Project teams learn and understand the Anaplan vocabulary.
- Project teams understand necessary resources for the implementation and can plan accordingly.
- Model Builders learn the fundamentals of building and maintaining an Anaplan model.

The instructor-led version of this course takes 1 day to complete.

### Anaplan Level 1 Model Building Certification

Getting ready for Anaplan is key to a collaborative and successful project, and our Level 1 Model Building course ensures Model Builders and end users leave prepared for implementation and certification.

**Summary:** This is a hands-on course; where you will build a Finance model for Unicorn Candy Company. This course is supported by over 50 micro-lessons on an assortment of topics to help you build your first model.

#### Course Objectives:

- Identify the elements of DISCO (Data, Input, System, Calculation, and Output) in a model schema.
- Build a model in Anaplan that includes modules, lists, line items and hierarchies.
- Import data into a model.
- Construct formulas and functions to calculate data and reference modules.
- Build user experience pages that include text, grids, charts.
- Assign role-based model access permissions.

The instructor-led version of this course takes 4 days to complete.
